

# Vladimir Vasilic

Senior Frontend Engineer (React / Vue / TypeScript)  
Banja Luka, Bosnia and Herzegovina  
+387 65 212 307  
vlado83bl@gmail.com  
Open to Remote (EU / US)

## PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building and modernizing enterprise SaaS platforms for US and EU markets. Experienced in large-scale distributed engineering environments (300+ developers) and complex multi-role business systems.

Strong focus on scalable frontend architecture, reusable component systems, and modernization of legacy applications. Advocate of modern AI-assisted development workflows that improve engineering velocity, code quality, and long-term maintainability. Contributed to global cloud commerce platforms (Ingram Micro – Fortune 100) and independently built enterprise operational dashboards from the ground up.

## CORE COMPETENCIES

- React.js, Vue.js, Next.js
- TypeScript, JavaScript (ES6+)
- AI-assisted Development (Copilot, ChatGPT, Cursor)
- Enterprise SaaS Platforms
- Frontend Architecture & Modernization
- Component System Design
- Multi-role & Permission-based Systems for Complex Admin & Operational Dashboards
- REST API Integration
- Agile (Scrum), Distributed Teams
- Git (GitHub)

## PROFESSIONAL EXPERIENCE

### Senior Frontend Developer

Stack-Wizard (Remote)  
03/2025 – 12/2025

#### Quality Logo Products, US

Led frontend modernization of a 20-year-old enterprise application used to manage the full lifecycle of branded product manufacturing, order processing, and nationwide logistics.

- Refactored legacy frontend codebase containing large monolithic files (8,000+ lines) into modular Vue 3 component-based architecture
- Performed incremental migration strategy to modern framework without disrupting ongoing production operations
- Reduced technical debt by isolating reusable UI components and improving code organization
- Collaborated with backend engineers and QA to ensure system stability during modernization process
- Integrated AI-assisted development workflows (Claude Code, Codex, Cursor) to optimize refactoring of large legacy modules, reducing implementation time and increasing development velocity during incremental modernization

**Tech:** Vue.js, JavaScript, Tailwind CSS, Git, AI tools

## Frontend Developer

**Royanis Adriatic (Remote)**

04/2024 – 03/2025

### Power Technologies (US Enterprise Client)

Designed and built the complete frontend architecture for a device management and operational dashboard from scratch.

- Implemented real-time monitoring system for locker groups, individual lockers, charging bays, and device status tracking
- Developed Kanban-based ticketing workflows and role-based permission system
- Established reusable component architecture to support long-term product evolution
- Worked directly with backend engineers to define API contracts and system behavior
- Applied AI-assisted development practices to accelerate frontend architecture setup and complex feature delivery, increasing iteration speed during early-stage product build

**Tech:** React, TypeScript, Next.js, Tailwind CSS, AI tools

## Frontend Developer

**Devtech (Remote – US Enterprise Clients)**

02/2022 – 02/2024

### CloudBlue (Ingram Micro – Fortune 100)

Contributed to a global cloud commerce marketplace developed by a distributed engineering organization of 300+ developers.

- Built scalable frontend modules within multi-tenant SaaS platform serving vendors and resellers globally
- Developed reusable permission-based UI components for complex multi-role workflows

- Worked in enterprise-grade development environment with structured code reviews, CI/CD, and controlled release cycles

**Tech:** Vue.js, TypeScript, Tailwind CSS

### **Pax8 (US Enterprise Client)**

- Contributed to development of CMS/storefront management system for enterprise sellers
- Built configurable and modular frontend features adaptable to various business models
- Worked within enterprise SaaS architecture focused on scalability and maintainability

**Tech:** React, TypeScript, Next.js

## **Frontend Developer**

### **Quantox Technology (Remote)**

10/2021 – 02/2022

- Developed interactive frontend applications with real-time API-driven data visualization
- Implemented dynamic UI components with performance-aware state management

**Tech:** Vue.js, TypeScript, JavaScript, SCSS

## **Frontend Developer**

### **Freelance (Upwork platform)**

02/2020 – 11/2021

- Built mobile-friendly websites from scratch based on client specs.
- Communicated directly with clients to refine requirements and deliver features

**Tech:** HTML, CSS, JavaScript, Bootstrap, Laravel, Git

## **Frontend Developer**

### **Kompetenz**

11/2020 – 05/2021

- Contributed to modernization of mature enterprise trading platform
- Developed frontend features for order processing and business workflows
- Improved maintainability within long-running production system

**Tech:** Vue.js, JavaScript, CSS, Bootstrap, Laravel
